Objective

Full Stack Developer with 1+ year of experience building web applications and backend services using **React.js**, **Node.js**, **ASP.NET**, and **SQL Server**. Experienced in developing client-facing applications, building REST APIs, debugging existing systems, and deploying applications through Azure DevOps. Strong in Python with a background in Artificial Intelligence and Machine Learning. Currently using **Claude** and AI-assisted development practices in day-to-day development while expanding my skills in Generative AI.

Education

- **CK College of Engineering and Technology** *2020 – 2024*
  *B.E Computer Science and Engineering with **CGPA: 8.32*** Cuddalore, Tamil Nadu
- **ARLM Matriculation Hr Sec School** *2018 – 2020*
  *HSC – Computer Science - **75.33%*** Cuddalore, Tamil Nadu
- **Lakshmi Matriculation School** *2018*
  *SSLC - **88.6%*** Cuddalore, Tamil Nadu

Experience

- **Tata Consultancy Services (TCS)** *April 2025 – Present*
  Full Stack Developer Chennai, Tamil Nadu, India
  - Develop and maintain client-facing web applications using **React.js** and **Node.js**, supporting applications used by clients on a daily basis.
  - Build and integrate **REST APIs** and backend services using **Node.js** and **ASP.NET**, with SQL Server used for application data.
  - Build **.NET API solutions** for application requirements and integrate backend services with React.js-based interfaces.
  - Use **Claude** as part of AI-assisted development for understanding code, exploring implementation approaches, debugging, and improving development efficiency.
  - Debug application issues across the frontend and backend, identify root causes, and implement fixes and feature changes based on project requirements.
  - Work with **Azure DevOps** for source control, branch management, code changes, and application deployment across development environments.
  - Work with development and project teams to understand requirements, implement changes, test application flows, and maintain existing enterprise applications.
- **KAT Enterprise LLC** *April 2024 – March 2025*
  SQL Server Developer & Mobile Application Developer Remote
  - Developed two mobile applications from scratch using **Flutter** for inventory management with payroll-enabled features.
  - Implemented modules to view sales reports, manage agents, define pay structures, and maintain user profiles.
  - Designed and integrated application databases using **SQL Server**.
  - Involved in end-to-end mobile app development, including UI implementation, business logic, and data handling.

Projects

- **Asthma Risk Prediction using Decision Tree Classifier** *2022*
  Python • Machine Learning • Flask • Sqlite3 [ ]
  - Collaborated with a team to develop a machine learning model for asthma risk prediction using the Decision Tree Classifier.
  - Developed the UI with Flask and connected the SQL database using Python's 'sqlite3'.
  - This project was awarded first place at the National Level Project Expo on two separate occasions.
- **Musix - Music Player App** *July 2024*
  Flutter • Getx • Dart • API • Mobile App Development [ ]
  - Developed a Flutter-based music player app integrated with iTunes API for previews, featuring random top hits, search, and filters.
  - Added region-based search, favorite tracks management, and background playback with persistent state.

- Designed a stylish bottom sheet for playback controls secured favorite tracks were saved persistently using shared preferences.

- **Parental Control Application** *2023*
  Python • Tkinter • Twilio [GitHub]
  - Developed a Parental Control application using Python, Tkinter for User Interface, and Twilio for sending Alert messages (SOS functionality).
  - Features include screen time control, location tracking, and usage restrictions.
  - Implemented content filtering to block unwanted websites and ensure safe browsing.

Skills

- **Programming:** Python, JavaScript, Java, SQL, Dart, C#
- **Front-End:** React.js, Flutter, HTML, CSS, Redux, GetX
- **Back-End:** Node.js, ASP.NET, Flask, Django
- **APIs:** REST APIs, RapidAPI
- **AI / Generative AI:** Claude, Prompt Engineering, AI-assisted Development
- **Databases:** MS SQL Server, MySQL, SQLite
- **Machine Learning:** Decision Trees, LSTM, YOLO, Pandas, NumPy, Matplotlib
- **Tools:** Git, GitHub, Azure DevOps, Visual Studio, Postman, Figma, Adobe XD

Area of Interest

- Full Stack Development
- AI and Generative AI
- Backend Development and REST API Development
- Machine Learning and Computer Vision
- Database Management and SQL
- Mobile Application Development

Achievements

- Won cash prizes in coding contests at various colleges.
- Participated in three hackathons, including one organized by SRM University, and **won a prize** in a college-hosted hackathon in March 2023.
- Designed and launched an **e-commerce website**, hosted on Render: shopper-4atx.onrender.com
- Honored with the **Dr. Kalam Young Achiever Award** by the World Youth Federation for project presentation.
- Secured prizes through **project presentations** at college-level and national-level events.
- Served as captain of the football team, leading the team to **runner-up in the Zonal Tournament 2023**.

Certifications

Anthropic	**Claude Certified Associate – Foundations**
IBM & TNSDC	Course and Project Completion (6 Months)
HackerRank	FrontEnd Developer
HackerRank	Python (Basic), Problem Solving (Basic)
Ingage Technologies	AR/VR Development
Codekaro Boot Camp	CSS Masterclass, JavaScript Masterclass

Leadership

- **President, Mobile App Development Club** *2022-2024*
  CK College of Engineering and Technology
- **Department Minister** *2023-2024*
  Computer Science and Engineering, CKCET
- **Team Captain - Football** *2023-2024*
  CK College of Engineering and Technology
